

JNSA REPORT

We JNSA have not been able to do enough activities during the covid situation for the last two years. And even now it has not changed.

The average age of our members is seventy-six. Under these circumstances, it is so difficult for older people, especially those who use buses or trains, to come to shuffleboard courts

As a result, some people decided to quit because they were afraid of getting the coronavirus. It is a big problem for us that the number of members decreases.

So that, we have started to create a new website to make shuffleboard more known to not only elder people but also young people.

We do hope that in the near future, we are able to enjoy shuffleboard with many friends, including young people as usual.

You can download our new JNSA website from here jnsa1979.com. The site is Japanese language. I hope you can imagine how much we love and enjoy shuffleboard from the pictures on the website.

Akira Kawai
JNSA President
